MAKE YOUR OWN LABELS

LT5C
ACCESSORIES

Accessories for the LT5C

Optimize your label printing workflow

Designed specifically for the LT5C, these accessories provide options for improved workflow and efficiency. Industrial design and heavy-duty construction makes these items perfect for high volume jobs.

LT5C Label Rewinder

Rewind printed output from your LT5C onto 3-inch cores. Speed is automatically synchronized by the tension arm and alignment is maintained by a steel connection plate for tight, consistent rolls.

LT5C Inline Matrix Remover

Create perfect edge-to-edge (full bleed) labels by printing over the cut edge of pre-die-cut labels. Removing the waste matrix in a single, inline pass provides optimal efficiency. A connection plate and tension arm ensures roll tightness and consistency.

*Also available in offline configuration.

LT5C Workbench

Create a complete print station with this industrial-grade work table, built specifically for the LT5C and its accessories. The table comes equipped with wheels for smooth mobility and storage shelves to stock tools, material, and other consumables.

*Available with or without extension shelf.
